

## Small Scale Co-generation

- **Equipment:** Entec United Engines – Buck’s Engines gas engine genset package - an 8.0L derivative of the General Motors industrial big block V8.
- **Provider:** ENTEC, Auckland and Taranaki NZ
- **Further Details:** Stuart Roberts, Sales & Marketing Manager. Phone: +64 (0)9 277 2211; Email: [sales@entec.co.nz](mailto:sales@entec.co.nz) or, Website: [www.entec.co.nz](http://www.entec.co.nz)
- **Characteristics:** Used extensively in the United States for oilfield power generation. Entec has further developed this unit’s suitability for small waste water treatment plant, landfill and on farm biogas installations in New Zealand, and the Pacific.

Available in a “plug and play” rapid field installation configuration with an output of 70-80kWe, depending on gas specification. Fuel gas, electrical and water connections are engineered for quick connection with “camlock” style fittings where applicable. The ability to synchronise with the network is included with the package.
